2020 One Day Workshop on Analytic and Enumerative Combinatorics

Speaker: 游森棚 (國立台灣師範大學數學系)

Title: Enumeration of Young tableaux

Time: (未定), Friday, October 30, 2020

Venue: Room 070221, 2F, Zhi Xi Building(志希樓 2 樓 E 化教室)

Abstract

The study of Young tableaux is a core theme in algebraic combinatorics as it appears in representation theory, geometry and algebra. In this introductory talk we will introduce and review some results arising from the enumeration of standard Young tableaux. We will keep the talk at an elementary level and no prerequisite is necessary.
